ABOUT ME

Aviation systems and program management leader with 15+ years of experience supporting aircraft maintenance, fleet sustainment, across complex aviation environments.

Hands-on and supervisory experience supporting aircraft maintenance, GACA, FAA, ICAO, Part-145 compliance. Strong understanding of continuing airworthiness principles, maintenance procedures, safety management, and operational compliance within a regulated military aviation environment. Proven capability in fault diagnosis, configuration management, aircraft documentation, and supervision of multi-disciplinary maintenance teams. Commercial CAMO / airline MRO and regulator experience. **PMP and PMI-ACP** certified, with deep exposure to aircraft lifecycle support.

EDUCATION

Bachelor of Avionics Engineering
(2004 - 08)

Master's in Signal & Image Processing
(2014-15)

LICENSES & CERTIFICATIONS

Project Management Institute, USA
(PMP, ACP)

Chengdu Aircraft Design Institute, China (Systems Engineering Lead)

Pakistan Engineering Council
Professional Engineer

EXPERIENCE (15 YRS)

● Program Lead, Avionics Systems Design (2023 - Present)

College of Aeronautical Engineering, Risalpur & NUTECH University

- Leadership in transformative programs (Capacity Building initiative by the Higher Education Commission, Pakistan)
- Head, Systems Engineering Program & Industry Partnerships
- Strong product management in Data, AI, AI/ML lifecycle, analytics, Power BI (KPIs, ROIs). Proficient in tools like MS Project, JIRA

● Deputy Director, Fighter Fleet Management (2020 - 23)

Aerospace & Defence / Systems Development

- Managed program-level integration of Aero subsystems, trend monitoring for predictive maintenance
- Provided PMO leadership, coordinating cross-functional teams, stakeholders, across fleet operations and iterative development cycles. Led Risk mitigation plans, RAID logs, and EVM reporting
- Managed performance of contracted AMOs and Heavy MROs for C-checks (scope, SLAs, 3rd-party KPIs)

● Avionics Systems Integration Lead (2018 - 19)

Chengdu Aircraft Design Institute (CADI), China

- Supervised maintenance, inspections, and fault rectification activities on LEAD fighter (JF-17) aircraft during development
- Prepared and supported CAMO/AMO audit activities
- Designed work packages prior to aircraft release to operations. Negotiated C-check contracts with Heavy MROs

● Maintenance Supervisor, AEW&C Aircraft (2016-18)

Airborne Early Warning & Control Systems Maintenance Lead

- Led maintenance planning & execution, spares planning and depot coordination. MTBF/MTTR analysis, data-driven corrective actions.
- Managed incorporation of Airworthiness Directives and Service Bulletins. Supervised a multidisciplinary team of 80 engineers and technicians using maintenance planning system (AMOS).

● Maintenance & Systems Engineer (2008-13)

Pakistan Aeronautical Complex Kamra, Pakistan

- Supported Aircraft System integration, modification, and retrofit activities, ensuring configuration baselines
- Implemented Configuration Management to track aircraft configuration changes, improving traceability & audit readiness
- Verified technical documentation, led aircraft modification programs for retrofit and upgrade.

CORE COMPETENCIES

- Aircraft Avionics Maintenance & Supervision
- Fault Diagnosis & System Testing
- Configuration Management & CMDB
- Continuing Airworthiness Principles (Part-145 aligned)
- Approved Technical Data & Work Pack Compliance
- OJT Supervision & Log Book Management
- Team Leadership & Task Authorisation
- Maintenance Planning & Delivery Targets
- Safety Management & Human Factors
- Audit Support & Process Compliance
- Fighter & AEW&C Aircraft Operations
- Stakeholder & OEM Coordination

NOTABLE NATIONAL PROJECTS

● Lead Fighter Systems Development

Indigenous Development of Mission Computer for Lead Aircraft

- Over **135 systems produced** and deployed on in-service aircraft, eliminating reliance on imports and generating **millions-dollar** cost savings for a Defence Organization.

● Development of a Novel ECCM Algorithm for Radars

- Developed and fielded ECCM algorithms and signal-processing solutions, providing a strong foundation for link budget analysis, payload performance evaluation, and communications reliability.

● Glass Cockpit Modification

Upgrade of Trainer Aircraft with Dynon and Garmin Suite:

- Managed OEM and supplier interfaces, export certification and logistics for glass cockpit modernization—supported export to 11 countries and post-delivery acceptance activities.

● Development of Configuration Management System

- Led configuration management for advanced aircraft undergoing simultaneous development and deployment, ensuring controlled evolution and mission support

ACHIEVEMENTS

● AWARDS & RECOGNITIONS

- **Chief of the Airstaff Commendation:** for exceptional Services during the avionics integration and retrofit Program
 - Appreciation letter from the Chairman of Pakistan Aeronautical Complex
- **Chengdu Aircraft Design Institute (CADI), China:** Commendation for Development & Integration activities of Lead Fighter Aircraft Program
- **Higher Education Commission (HEC), Pakistan:** Selected for the National Capacity Building Program in System Engineering and allied disciplines

● TRAINING COURSES & WORKSHOPS

- **Transfer of Source Code (Aircraft) Training (2018-20):** Chengdu Aircraft Design Institute, China
- **System Engineering Specialization:** University of Colorado Boulder, USA
- **Engineering Management Specialization:** Rice University, USA
- **Project Management Specialization:** Google
- Fighter Aircraft & AWACS Aircraft Type Rating Courses
- Basic Staff Course
- Senior Command & Staff Course
