ABOUT ME

Strategy and defense programs professional with 15+ years of experience across aerospace and defense environments, supporting strategy-to-capture execution, opportunity shaping, and complex international programs. Proven ability to translate operational capability gaps into structured technical and programmatic solutions, aligning stakeholders across military customers, industry partners, and internal delivery teams. Extensive experience in international defense programs, export platforms, localization initiatives, and PMO governance, with strong technical credibility in mission systems, C2, and avionics integration. PMP and PMI-ACP certified, bringing disciplined execution, risk management, and executive-level decision support to high-tempo defense pursuits.

EDUCATION

BE, Aeronautical Engineering
2004 - 2008

- College of Aeronautical Engineering, Risalpur

MS (Signal & Image Processing)
2013 - 2015

- Air University, Islamabad

LICENSES & CERTIFICATIONS

Project Management Institute, USA

- Project Management Professional
- Agile Certified Practitioner (ACP)

Pakistan Engineering Council

- Professional Engineer (PE)

PROFESSIONAL EXPERIENCE (15 YRS)

● Program Lead, Professional Education (2023 - Present)

College of Aeronautical Engineering, Risalpur & NUTECH University

- Support capability development and workforce strategy for national aerospace and defense programs.
- Advise senior stakeholders on technology roadmaps, skills localization, and system engineering maturity, supporting sustainable defense ecosystem growth

● Deputy Director Avionics, PMO (2020 - 23)

Air Force PMO for Systems Integration, Flight Tests and Operations

- Supported strategy-to-execution alignment for multiple fixed-wing, UAV, translating Air Force operational needs into actionable program strategies and delivery plans.
- Coordinated engineering, operations, test, & logistics teams. Led programs, risk mitigation, RAID management, and EVM reporting.
- Supported international collaboration and export projects, airworthiness certification, and acceptance Tests activities

● Aerospace Systems Integration Lead (2018 - 20)

Chengdu Aircraft Design Institute (CADI), China

- Worked within a multi-national defense environment, supporting integration, validation, and acceptance of critical aircraft systems.
- Supported early solution shaping and requirements definition, aligning system architectures and delivery timelines.
- Acted as a technical and program interface between customer representatives, and program leadership

● Engineering Operations Manager (2016 - 18)

Airborne Early Warning & Control Systems Engineer – Air Force

- Supported sustainment and mission readiness of C2-enabled AEW&C platforms, operational availability, reliability analysis, and long-term support strategies.
- Provided real-time technical advisory support to operational stakeholders in high-tempo environments

● Systems Engineering & Integration Engineer (2008 - 13)

Pakistan Aeronautical Complex Kamra, Pakistan

- Led Agile program delivery of aircraft systems using iterative planning, incremental delivery, and stakeholder engagement
- Project manager for aircraft platform modernization that delivered exports and generated multi-million dollar revenue. Managed program scope, procurement, QA, schedule, and acceptance

CORE COMPETENCIES

- **Strategic & International Program Exposure.** International defense collaboration and export programs (Asia & Middle East). Exposure to defense exports, customer acceptance, and localization-driven delivery models. Experience supporting capability-based planning, mission systems, radar, and C2 environments. Stakeholder engagement across military customers, engineers, program managers, and executive leadership
- **Systems Integration .** Led system-of-systems integration activities across avionics, mission systems, and weapons platforms using MBSE. Ensured architectural coherence, interface control, configuration alignment.
- **Validation, Test & Airworthiness.** Planned and supported verification and validation, system qualification, acceptance, and airworthiness certification activities. Actively participated in flight test campaigns for fighter and AEW&C platforms, and associated AGE and maintenance processes.
- **Configuration & Lifecycle Management.** End-to-end requirements, interface, and configuration management across the system lifecycle. supported operations serviceability above 90%
- MIL-STD, DO-178C, and DO-254
- **Worked on government-to-government platform exports and certification package**

NOTABLE NATIONAL PROJECTS

- **Aircraft Development Program – Subsystem Development Lead**
Indigenous Backup Mission Computer
 - *Delivered **135+ systems** installed on in-service fighter aircraft, eliminating import dependency and enabling **USD 1.27M+** cost savings for the Air Force.*
- **Radar Systems Program – ECCM Capability Development**
 - *Developed & fielded a novel ECCM algorithm during MS for ground radar systems. Governed requirements management, verification planning, and deployment schedules.*
- **Aircraft Modernization Program – Glass Cockpit**
 - *Led glass cockpit modernization program, integrating Dynon and Garmin avionics suites on trainer aircraft. Managed commercial negotiations, production handover, certification, and export logistics to **11 countries**, generating multi-million-dollar revenue.*
- **Fleet Sustainment Program – Configuration Management System**
 - *Architected and deployed an enterprise Configuration Management Database (CMDB).*
 - *Enabled disciplined change control, improved maintenance turnaround times, and sustained fleet serviceability above 90%*

ACHIEVEMENTS

- **AWARDS & RECOGNITIONS**
 - **Chief of the Airstaff Commendation:** for exceptional Services during the avionics integration and retrofit Program
 - Appreciation letter from the Chairman of Pakistan Aeronautical Complex
 - **Chengdu Aircraft Design Institute (CADI), China:** Commendation for Development & Integration activities of Lead Fighter Aircraft Program
 - **Higher Education Commission (HEC), Pakistan:** Selected for the National Capacity Building Program in System Engineering and allied disciplines
- **TRAINING COURSES & WORKSHOPS**
 - **Transfer of Source Code (Aircraft):** Chengdu Aircraft Design Institute, China
 - **System Engineering Specialization:** University of Colorado Boulder, USA
 - **Engineering Management Specialization:** Rice University, USA
 - **Project Management Specialization:** Google
 - Fighter Aircraft & AWACS Aircraft Type Rating Courses
 - Basic Staff Course
 - Senior Command & Staff Course
